TECHNICAL SPECIFICATIONS - SECTION 001: CONCRETE

1.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
1.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
1.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 002: REINFORCEMENT

2.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
2.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
2.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 003: STRUCTURAL STEEL

3.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
3.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
3.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 004: MASONRY

4.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
4.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
4.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 005: WATERPROOFING

5.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
5.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
5.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 006: DOORS AND WINDOWS

6.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
6.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
6.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 007: PLASTERING

7.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
7.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
7.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 008: PAINTING

8.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
8.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
8.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 009: TILING

9.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
9.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
9.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 010: CEILINGS

10.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
10.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
10.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 011: HVAC

11.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
11.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
11.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 012: ELECTRICAL

12.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
12.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
12.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 013: CONCRETE

13.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
13.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
13.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 014: REINFORCEMENT

14.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
14.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
14.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 015: STRUCTURAL STEEL

15.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
15.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
15.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 016: MASONRY

16.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
16.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
16.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 017: WATERPROOFING

17.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
17.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
17.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 018: DOORS AND WINDOWS

18.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
18.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
18.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 019: PLASTERING

19.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
19.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
19.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 020: PAINTING

20.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
20.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
20.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 021: TILING

21.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
21.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
21.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 022: CEILINGS

22.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
22.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
22.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 023: HVAC

23.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
23.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
23.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 024: ELECTRICAL

24.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
24.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
24.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 025: CONCRETE

25.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
25.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
25.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 026: REINFORCEMENT

26.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
26.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
26.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 027: STRUCTURAL STEEL

27.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
27.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
27.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 028: MASONRY

28.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
28.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
28.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 029: WATERPROOFING

29.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
29.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
29.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 030: DOORS AND WINDOWS

30.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
30.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
30.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 031: PLASTERING

31.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
31.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
31.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 032: PAINTING

32.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
32.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
32.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 033: TILING

33.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
33.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
33.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 034: CEILINGS

34.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
34.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
34.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 035: HVAC

35.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
35.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
35.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 036: ELECTRICAL

36.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
36.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
36.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 037: CONCRETE

37.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
37.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
37.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 038: REINFORCEMENT

38.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
38.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
38.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 039: STRUCTURAL STEEL

39.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
39.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
39.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 040: MASONRY

40.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
40.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
40.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 041: WATERPROOFING

41.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
41.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
41.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 042: DOORS AND WINDOWS

42.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
42.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
42.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 043: PLASTERING

43.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
43.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
43.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 044: PAINTING

44.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
44.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
44.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 045: TILING

45.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
45.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
45.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 046: CEILINGS

46.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
46.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
46.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 047: HVAC

47.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
47.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
47.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 048: ELECTRICAL

48.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
48.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
48.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 049: CONCRETE

49.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
49.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
49.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 050: REINFORCEMENT

50.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
50.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
50.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 051: STRUCTURAL STEEL

51.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
51.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
51.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 052: MASONRY

52.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
52.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
52.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 053: WATERPROOFING

53.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
53.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
53.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 054: DOORS AND WINDOWS

54.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
54.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
54.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 055: PLASTERING

55.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
55.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
55.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 056: PAINTING

56.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
56.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
56.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 057: TILING

57.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
57.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
57.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 058: CEILINGS

58.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
58.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
58.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 059: HVAC

59.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
59.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
59.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 060: ELECTRICAL

60.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
60.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
60.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 061: CONCRETE

61.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
61.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
61.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 062: REINFORCEMENT

62.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
62.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
62.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 063: STRUCTURAL STEEL

63.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
63.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
63.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 064: MASONRY

64.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
64.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
64.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 065: WATERPROOFING

65.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
65.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
65.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 066: DOORS AND WINDOWS

66.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
66.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
66.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 067: PLASTERING

67.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
67.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
67.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 068: PAINTING

68.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
68.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
68.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 069: TILING

69.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
69.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
69.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 070: CEILINGS

70.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
70.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
70.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 071: HVAC

71.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
71.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
71.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 072: ELECTRICAL

72.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
72.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
72.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 073: CONCRETE

73.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
73.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
73.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 074: REINFORCEMENT

74.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
74.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
74.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 075: STRUCTURAL STEEL

75.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
75.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
75.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 076: MASONRY

76.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
76.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
76.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 077: WATERPROOFING

77.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
77.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
77.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 078: DOORS AND WINDOWS

78.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
78.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
78.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 079: PLASTERING

79.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
79.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
79.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 080: PAINTING

80.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
80.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
80.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 081: TILING

81.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
81.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
81.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 082: CEILINGS

82.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
82.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
82.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 083: HVAC

83.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
83.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
83.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 084: ELECTRICAL

84.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
84.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
84.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 085: CONCRETE

85.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
85.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
85.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 086: REINFORCEMENT

86.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
86.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
86.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 087: STRUCTURAL STEEL

87.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
87.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
87.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 088: MASONRY

88.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
88.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
88.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 089: WATERPROOFING

89.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
89.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
89.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 090: DOORS AND WINDOWS

90.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
90.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
90.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 091: PLASTERING

91.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
91.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
91.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 092: PAINTING

92.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
92.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
92.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 093: TILING

93.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
93.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
93.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 094: CEILINGS

94.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
94.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
94.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 095: HVAC

95.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
95.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
95.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 096: ELECTRICAL

96.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
96.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
96.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 097: CONCRETE

97.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
97.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
97.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 098: REINFORCEMENT

98.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
98.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
98.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 099: STRUCTURAL STEEL

99.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
99.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
99.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 100: MASONRY

100.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
100.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
100.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 101: WATERPROOFING

101.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
101.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
101.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 102: DOORS AND WINDOWS

102.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
102.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
102.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 103: PLASTERING

103.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
103.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
103.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 104: PAINTING

104.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
104.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
104.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 105: TILING

105.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
105.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
105.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 106: CEILINGS

106.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
106.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
106.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 107: HVAC

107.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
107.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
107.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 108: ELECTRICAL

108.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
108.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
108.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 109: CONCRETE

109.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
109.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
109.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 110: REINFORCEMENT

110.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
110.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
110.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 111: STRUCTURAL STEEL

111.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
111.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
111.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 112: MASONRY

112.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
112.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
112.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 113: WATERPROOFING

113.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
113.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
113.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 114: DOORS AND WINDOWS

114.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
114.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
114.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 115: PLASTERING

115.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
115.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
115.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 116: PAINTING

116.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
116.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
116.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 117: TILING

117.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
117.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
117.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 118: CEILINGS

118.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
118.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
118.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 119: HVAC

119.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
119.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
119.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 120: ELECTRICAL

120.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
120.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
120.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 121: CONCRETE

121.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
121.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
121.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 122: REINFORCEMENT

122.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
122.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
122.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 123: STRUCTURAL STEEL

123.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
123.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
123.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 124: MASONRY

124.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
124.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
124.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 125: WATERPROOFING

125.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
125.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
125.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 126: DOORS AND WINDOWS

126.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
126.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
126.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 127: PLASTERING

127.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
127.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
127.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 128: PAINTING

128.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
128.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
128.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 129: TILING

129.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
129.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
129.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 130: CEILINGS

130.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
130.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
130.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 131: HVAC

131.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
131.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
131.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 132: ELECTRICAL

132.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
132.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
132.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 133: CONCRETE

133.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
133.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
133.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 134: REINFORCEMENT

134.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
134.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
134.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 135: STRUCTURAL STEEL

135.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
135.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
135.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 136: MASONRY

136.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
136.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
136.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 137: WATERPROOFING

137.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
137.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
137.3 Quality control. Inspection and testing shall follow the approved ITP.
137.4 Curing. Concrete shall be kept continuously moist for a curing period of 7 days.

TECHNICAL SPECIFICATIONS - SECTION 138: DOORS AND WINDOWS

138.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
138.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
138.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 139: PLASTERING

139.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
139.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
139.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 140: PAINTING

140.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
140.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
140.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 141: TILING

141.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
141.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
141.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 142: CEILINGS

142.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
142.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
142.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 143: HVAC

143.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
143.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
143.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 144: ELECTRICAL

144.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
144.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
144.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 145: CONCRETE

145.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
145.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
145.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 146: REINFORCEMENT

146.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
146.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
146.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 147: STRUCTURAL STEEL

147.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
147.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
147.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 148: MASONRY

148.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
148.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
148.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 149: WATERPROOFING

149.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
149.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
149.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 150: DOORS AND WINDOWS

150.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
150.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
150.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 151: PLASTERING

151.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
151.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
151.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 152: PAINTING

152.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
152.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
152.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 153: TILING

153.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
153.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
153.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 154: CEILINGS

154.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
154.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
154.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 155: HVAC

155.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
155.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
155.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 156: ELECTRICAL

156.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
156.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
156.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 157: CONCRETE

157.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
157.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
157.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 158: REINFORCEMENT

158.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
158.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
158.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 159: STRUCTURAL STEEL

159.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
159.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
159.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 160: MASONRY

160.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
160.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
160.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 161: WATERPROOFING

161.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
161.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
161.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 162: DOORS AND WINDOWS

162.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
162.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
162.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 163: PLASTERING

163.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
163.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
163.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 164: PAINTING

164.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
164.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
164.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 165: TILING

165.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
165.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
165.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 166: CEILINGS

166.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
166.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
166.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 167: HVAC

167.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
167.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
167.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 168: ELECTRICAL

168.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
168.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
168.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 169: CONCRETE

169.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
169.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
169.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 170: REINFORCEMENT

170.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
170.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
170.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 171: STRUCTURAL STEEL

171.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
171.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
171.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 172: MASONRY

172.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
172.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
172.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 173: WATERPROOFING

173.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
173.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
173.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 174: DOORS AND WINDOWS

174.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
174.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
174.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 175: PLASTERING

175.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
175.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
175.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 176: PAINTING

176.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
176.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
176.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 177: TILING

177.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
177.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
177.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 178: CEILINGS

178.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
178.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
178.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 179: HVAC

179.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
179.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
179.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 180: ELECTRICAL

180.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
180.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
180.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 181: CONCRETE

181.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
181.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
181.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 182: REINFORCEMENT

182.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
182.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
182.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 183: STRUCTURAL STEEL

183.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
183.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
183.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 184: MASONRY

184.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
184.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
184.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 185: WATERPROOFING

185.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
185.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
185.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 186: DOORS AND WINDOWS

186.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
186.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
186.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 187: PLASTERING

187.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
187.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
187.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 188: PAINTING

188.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
188.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
188.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 189: TILING

189.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
189.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
189.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 190: CEILINGS

190.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
190.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
190.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 191: HVAC

191.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
191.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
191.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 192: ELECTRICAL

192.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
192.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
192.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 193: CONCRETE

193.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
193.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
193.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 194: REINFORCEMENT

194.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
194.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
194.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 195: STRUCTURAL STEEL

195.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
195.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
195.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 196: MASONRY

196.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
196.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
196.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 197: WATERPROOFING

197.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
197.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
197.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 198: DOORS AND WINDOWS

198.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
198.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
198.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 199: PLASTERING

199.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
199.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
199.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 200: PAINTING

200.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
200.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
200.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 201: TILING

201.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
201.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
201.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 202: CEILINGS

202.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
202.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
202.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 203: HVAC

203.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
203.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
203.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 204: ELECTRICAL

204.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
204.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
204.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 205: CONCRETE

205.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
205.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
205.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 206: REINFORCEMENT

206.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
206.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
206.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 207: STRUCTURAL STEEL

207.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
207.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
207.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 208: MASONRY

208.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
208.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
208.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 209: WATERPROOFING

209.1 General. This section covers the requirements for waterproofing works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
209.2 Submittals. Submit shop drawings and method statements for waterproofing at least 21 days before starting the work.
209.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 210: DOORS AND WINDOWS

210.1 General. This section covers the requirements for doors and windows works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
210.2 Submittals. Submit shop drawings and method statements for doors and windows at least 21 days before starting the work.
210.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 211: PLASTERING

211.1 General. This section covers the requirements for plastering works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
211.2 Submittals. Submit shop drawings and method statements for plastering at least 21 days before starting the work.
211.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 212: PAINTING

212.1 General. This section covers the requirements for painting works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
212.2 Submittals. Submit shop drawings and method statements for painting at least 21 days before starting the work.
212.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 213: TILING

213.1 General. This section covers the requirements for tiling works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
213.2 Submittals. Submit shop drawings and method statements for tiling at least 21 days before starting the work.
213.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 214: CEILINGS

214.1 General. This section covers the requirements for ceilings works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
214.2 Submittals. Submit shop drawings and method statements for ceilings at least 21 days before starting the work.
214.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 215: HVAC

215.1 General. This section covers the requirements for HVAC works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
215.2 Submittals. Submit shop drawings and method statements for HVAC at least 21 days before starting the work.
215.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 216: ELECTRICAL

216.1 General. This section covers the requirements for electrical works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
216.2 Submittals. Submit shop drawings and method statements for electrical at least 21 days before starting the work.
216.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 217: CONCRETE

217.1 General. This section covers the requirements for concrete works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
217.2 Submittals. Submit shop drawings and method statements for concrete at least 21 days before starting the work.
217.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 218: REINFORCEMENT

218.1 General. This section covers the requirements for reinforcement works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
218.2 Submittals. Submit shop drawings and method statements for reinforcement at least 21 days before starting the work.
218.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 219: STRUCTURAL STEEL

219.1 General. This section covers the requirements for structural steel works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
219.2 Submittals. Submit shop drawings and method statements for structural steel at least 21 days before starting the work.
219.3 Quality control. Inspection and testing shall follow the approved ITP.

TECHNICAL SPECIFICATIONS - SECTION 220: MASONRY

220.1 General. This section covers the requirements for masonry works. All materials shall comply with the Saudi Building Code (SBC) and approved samples.
220.2 Submittals. Submit shop drawings and method statements for masonry at least 21 days before starting the work.
220.3 Quality control. Inspection and testing shall follow the approved ITP.
